Projects

Audientra – Music Streaming Backend System | *Node.js, Express.js, MongoDB, JWT, ImageKit* **Jun 2025 -Jul 2025**

- Architected a backend music streaming system enabling secure **user authentication, track uploads, and playlist management** using Node.js and Express.js.
- Designed and implemented **RESTful APIs with JWT-based authentication**, structured MongoDB (Mongoose) schemas, and optimized CRUD operations for users, tracks, and playlists.
- Integrated **ImageKit cloud storage** with **Multer** middleware, environment-based configuration (.env), and modular backend architecture to ensure secure file uploads, media handling, and production-ready scalability.
- Repository Link: **https://github.com/sumitsharma-code/spotify-clone**

Quantra – Inventory App | *React.js, Node.js, Express.js, MongoDB, JWT* **Dec 2025 -Jan 2026**

- Developed a **full-stack inventory management system** using MongoDB, Express.js, React, and Node.js to track products, orders, and stock levels in real time.
- Built scalable RESTful APIs for inventory operations including product management, order tracking, and real-time stock updates, while implementing JWT-based authentication and role-based access control for secure backend operations.
- Designed a responsive analytics dashboard to visualize key metrics such as revenue, product availability, and active orders, enabling efficient inventory monitoring and data-driven decision making.
- Repository Link: **https://github.com/sumitsharma-code/inventory-app**

Hospital Patient Management System | *C, C++* **Jun 2025 -Jul 2025**

- Engineered a **console-based** Hospital Patient Management System in C++, leveraging singly linked lists for efficient in-memory storage, insertion, deletion, and traversal of patient records.
- Designed and integrated **file-based data persistence** (File I/O) to reliably store and retrieve patient information, ensuring data consistency across program executions.
- Enhanced system reliability through unique ID validation, structured input handling, and a modular multi-file architecture, improving maintainability and fault tolerance.
- Repository Link: **https://github.com/sumitsharma-code/HospitalSystem**

Training

Credit-Linked program in Artificial Intelligence & Machine Learning (IIT Guwahati) **May 2025 – Mar 2026**

- Pursuing an industry-oriented AI & Machine Learning curriculum covering data preprocessing, supervised and unsupervised learning, model evaluation, and performance optimization.
- Gaining hands-on experience in building, training, and validating ML models using real-world datasets with practical implementation of regression, classification, and clustering algorithms.
- Applying concepts such as feature engineering, cross-validation, overfitting prevention, and evaluation metrics (Accuracy, Precision, Recall, F1-score) in project-based assignments.

Certificates / Certifications

ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM – *Certificate Link* **Aug 2025**

Fundamentals of Data Structures using C++ - *Certificate Link* **Jan 2025**

Skills

Languages: C++, Python, JavaScript

Technologies/Frameworks: HTML, CSS, React JS, Node JS, MongoDB, Tailwind CSS, Git, GitHub, Blender

Domain Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design, Object-Oriented Programming

Education

Lovely Professional University **2023 – 2027**
Bachelor of Technology - Computer Science and Engineering — CGPA: 7.87 *Phagwara, Punjab*

Pathseekers School **2021 – 2022**
12th — Percentage: 81.4% *Beas, Punjab*

Pathseekers School **2019 – 2020**
10th — Percentage: 89.2% *Beas, Punjab*
